

MAHMOOD FATHY

Senior Mobile & Full-Stack Engineer

Email | WhatsApp | LinkedIn | GitHub +20 106 629 3631 | Egypt · Remote

PROFILE

Mobile-first product engineer with 5+ years delivering production iOS and Android apps for international teams. I work across Flutter, Laravel, Next.js and Supabase, with strong hands-on experience in GPS tracking, location and maps, checkout and payment flows. Contributed to 50languages, serving 1M+ users with 5M+ Android downloads.

CORE SKILLS

Flutter / Dart · GetX · Firebase · Supabase / Edge Functions · Next.js · Laravel · REST APIs · GPS / Geolocation / Maps · Checkout / Payments / In-app purchases · Push notifications · App Store / Google Play

SELECTED EXPERIENCE

50languages | Lead Flutter Developer

2025 - Present

- 1M+ users and 5M+ Android downloads: deliver learning flows, games and in-app monetization across 50+ languages.
- Own feature delivery, production fixes and release work across Flutter and the Laravel-backed web platform.
- Handle multilingual content, app stability and store submissions for both mobile platforms.

WSSEL | Mobile Product Engineer

2026

- Worked across the customer, restaurant and courier Flutter apps: search, checkout and payment methods, delivery zones, order tracking and notifications.
- Integrated APIs and refined Arabic, Hebrew and English flows; supported iOS and Android production releases.
- Worked through operational issues from restaurant alerts to courier assignment and order-state changes.

County Cars | Mobile & Product Engineer

2025 - Present

- Built UK Special Educational Needs (SEN) school transport journeys for parents, drivers and passenger assistants, including GPS tracking, maps, trips and daily checks.
- Integrated Supabase and AWS Rekognition driver selfie verification; contributed to the Next.js operations dashboard.
- Supported authentication, account approvals, document flows and cross-role production fixes.

Persici Agency | Senior Flutter Developer

Contract

- Shipped Hadiya gifting journeys with AI-powered gift discovery, WhatsApp OTP, Apple / Google sign-in, profiles and notifications.
- Handled API integration, quality fixes and iOS / Android release readiness.

RSS Group & WOA | Flutter Developer

Earlier work

- Delivered commerce apps (Jiffy, Bebe Blanc) with checkout and payment integrations, plus a multi-country employee and order system with QR workflows.

LIVE WORK
